Region ▾

Indicator (Action) ▾

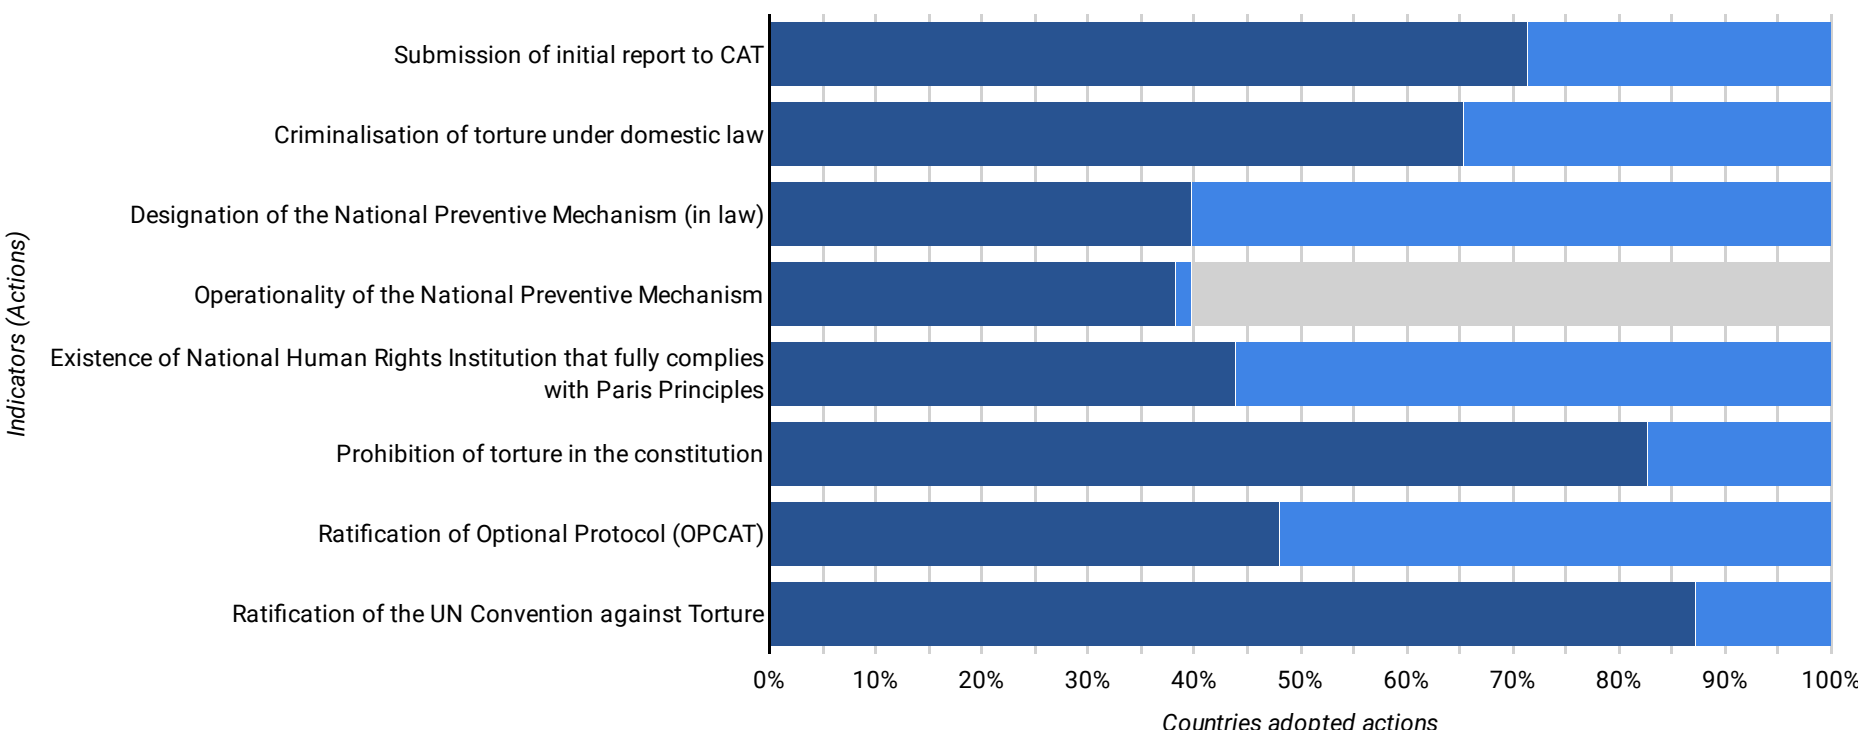

This dashboard presents 40 years of global progress in preventing and prohibiting torture, using data provided by the **Association for the Prevention of Torture (APT)**.

It highlights key actions, regional trends, and global achievements, illustrating how collective efforts have strengthened protections worldwide.

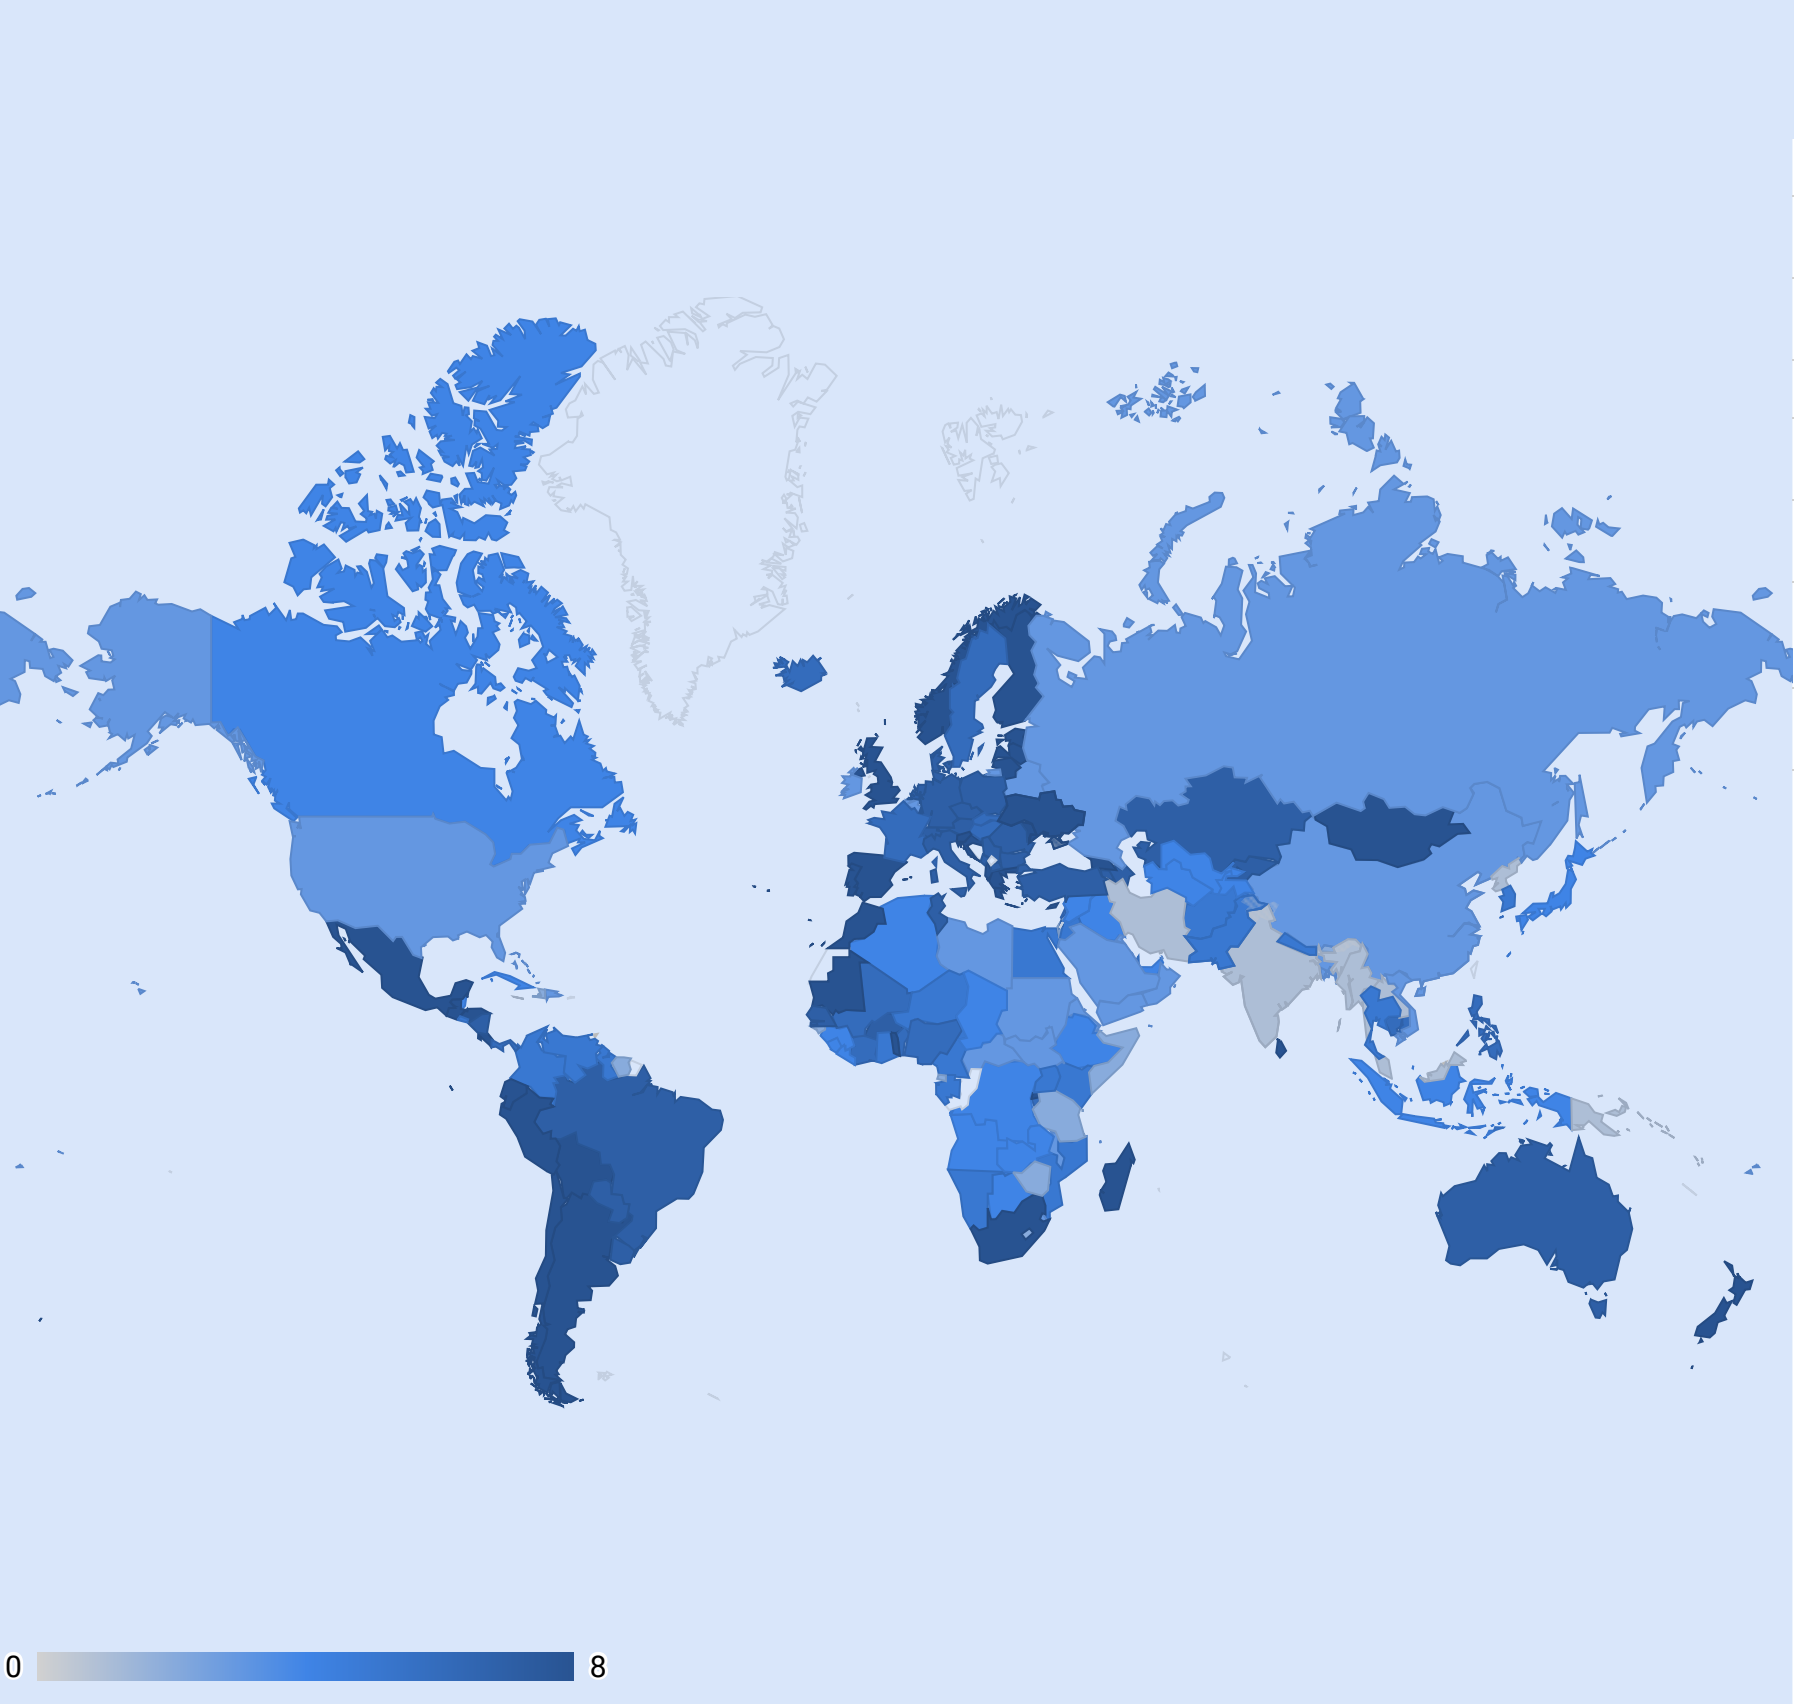

The data include 8 indicators, identified by **APT** and referred to here as 'actions,' which represent the steps countries have taken toward torture prevention.

Together, they form a strong legal basis for torture prevention. Positive responses to these indicators are considered concrete actions contributing to progress.

State of Torture Prevention in the World: 8 Actions for Progress
